

Weather Secure Pro

Forecast Risk

Our significant experience in agriculture and weather analytics along with our hand-on experience in implementing some of the most innovative and complex index insurance programs globally has resulted in this ground-breaking tool which helps risk underwriters globally to analyze and rate index insurance and weather derivative contracts

- Optimize subsidies through risk forecasting
- Decide indemnity level scientifically
- Evaluate and price risks in PMFBY
- Premium calculator to give benchmark rates
- Proxy parameters to ensure high-quality crop statistics
 - NDVI map for 3.5 million sq.kms
 - Yield data quality and consistency checks
 - Improve yield data quality and reduce premium rates
- Know the details of the scheme, crops, sum insured, premium amount, implementing agency, etc.
- Justify loss assessment and claim settlement
 - Integration of crop insurance information with land records
 - Integration of yield/weather data
 - Linking weather and satellite report with adverse events

WEATHER**SECURE**^{Pro}

A powerful new way to hedge against catastrophic risks.
